self-diagnosis function.

Includes a 1 year manufacturer warranty with extended warranty available.

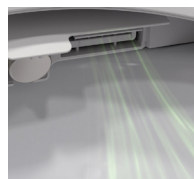

Rear wash

Ladies wash

Side Control

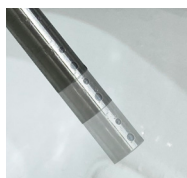

Air dryer

Heated Seat

Child Mode

Massage & Move

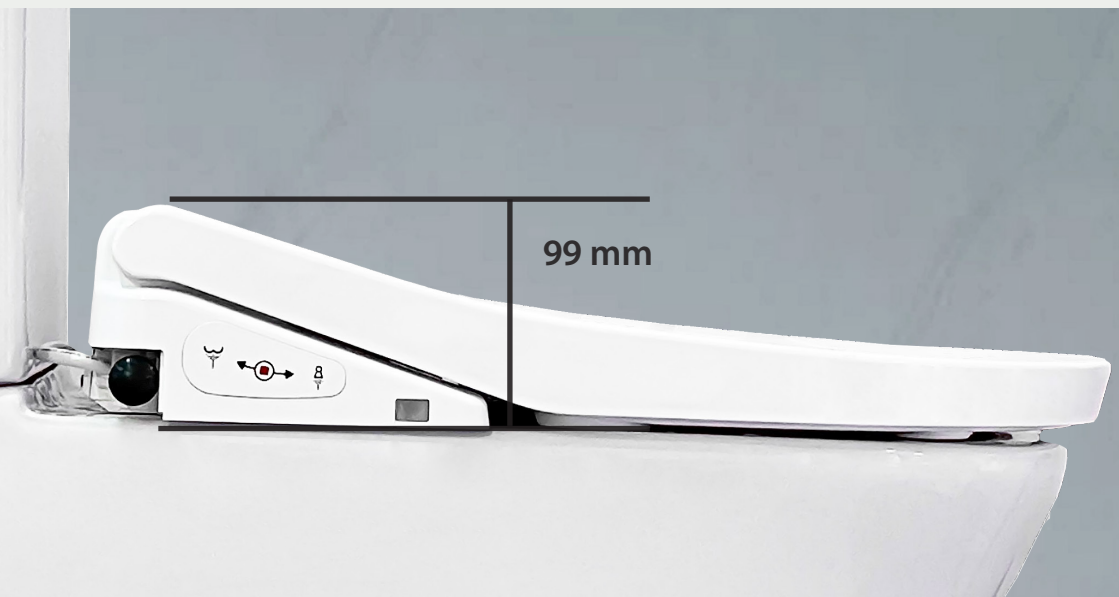

Night Light

The Slimmest bidet in the market

Classy and elegant design for your contemporary bathroom

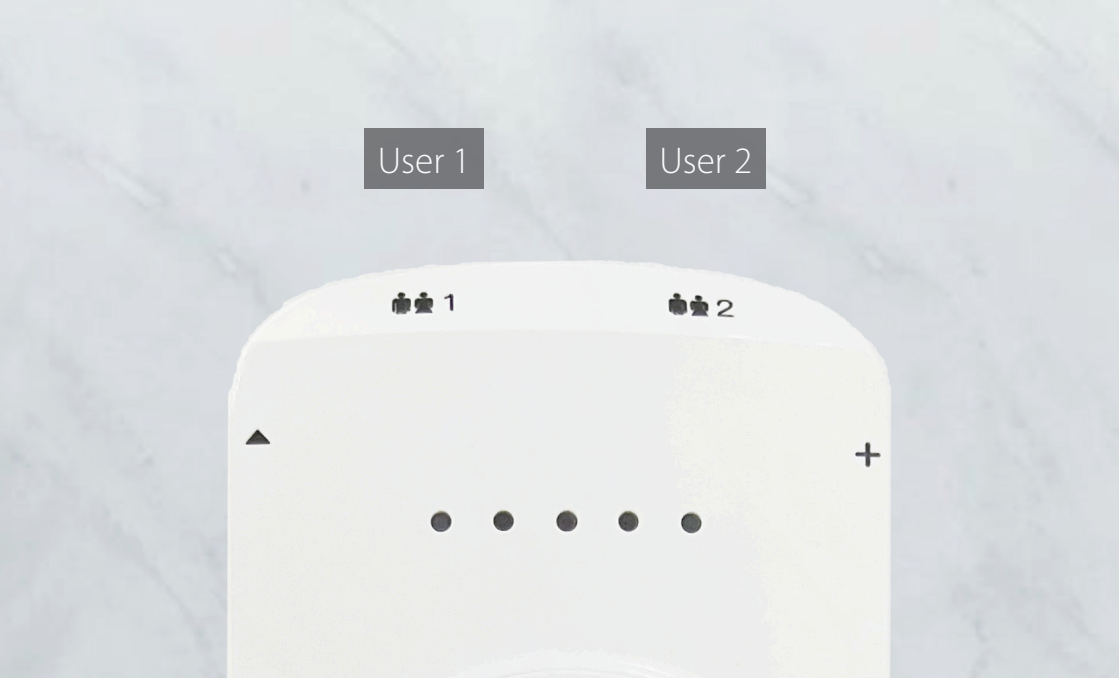

Ultra-Slim Profile - 99mm high - Slim profile bidets are a popular option for those who have limited space in their bathroom or prefer a more compact design.

RF Remote Control - RF technology boasts a broader signal range, ensuring better connectivity between the remote and the Bidet as it does not rely on line-of-sight communication.

Raised buttons on the remote control provide easy user interface.

Light indicators display changes in remote control settings.

User Preset - two users can preset and store their favourite settings.

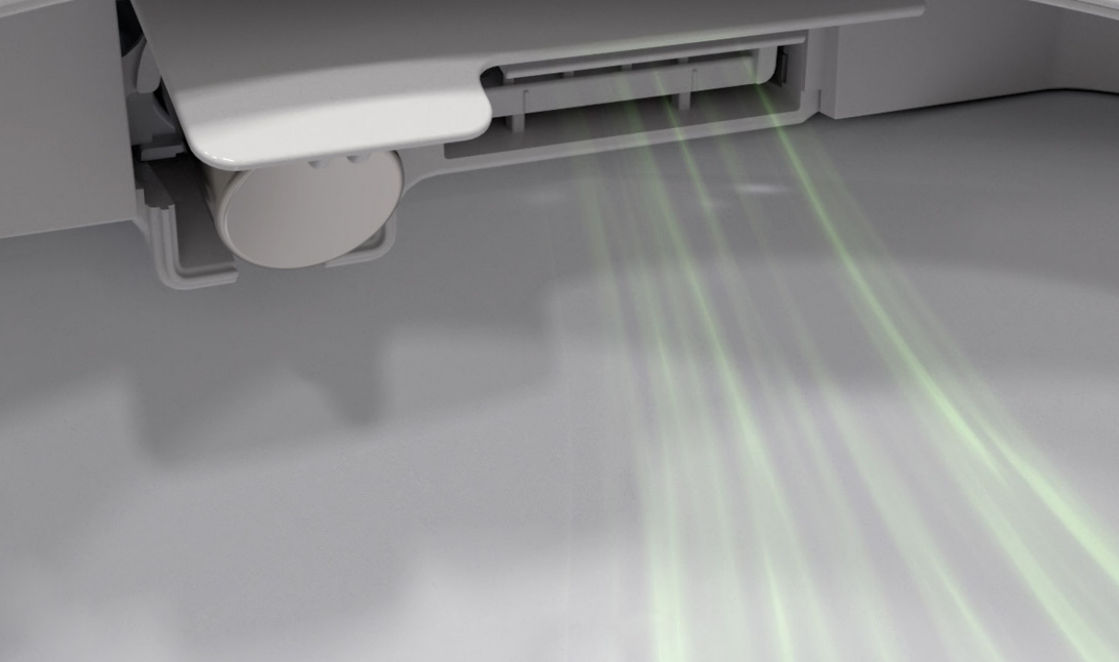

Side Control - Swipe and Tap Auxiliary Panel - A swipe and tap auxiliary panel features a touchscreen panel that allows users to control the bidet's features with the swipe or tap of a finger.

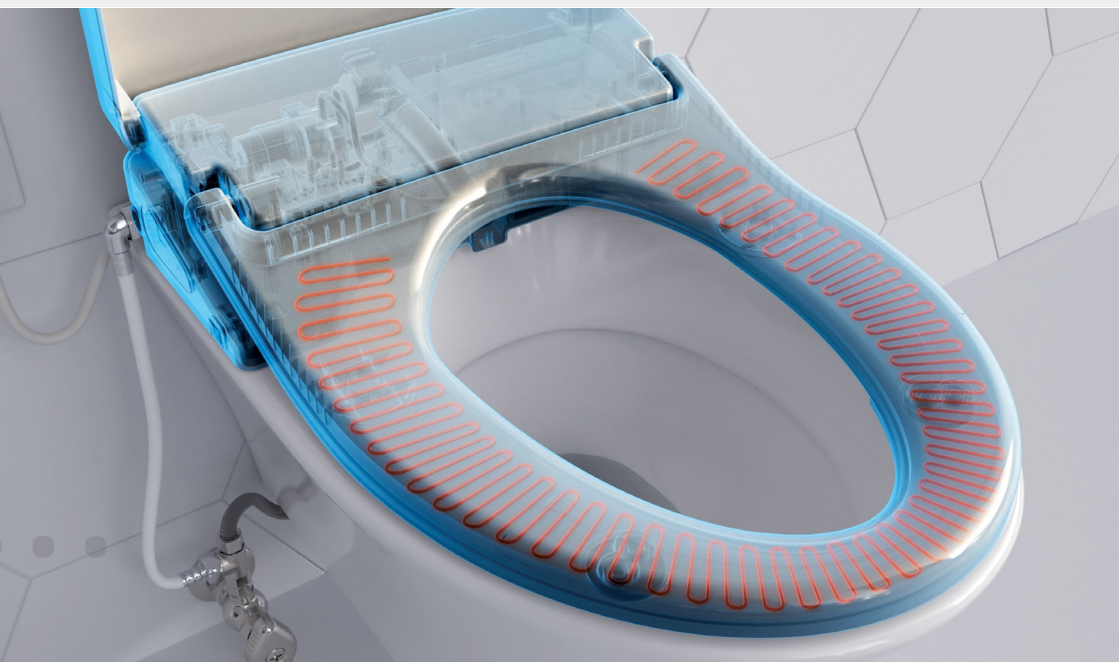

Three different jets provide you with your preferred wash, with optional Pulse and Oscillate functions

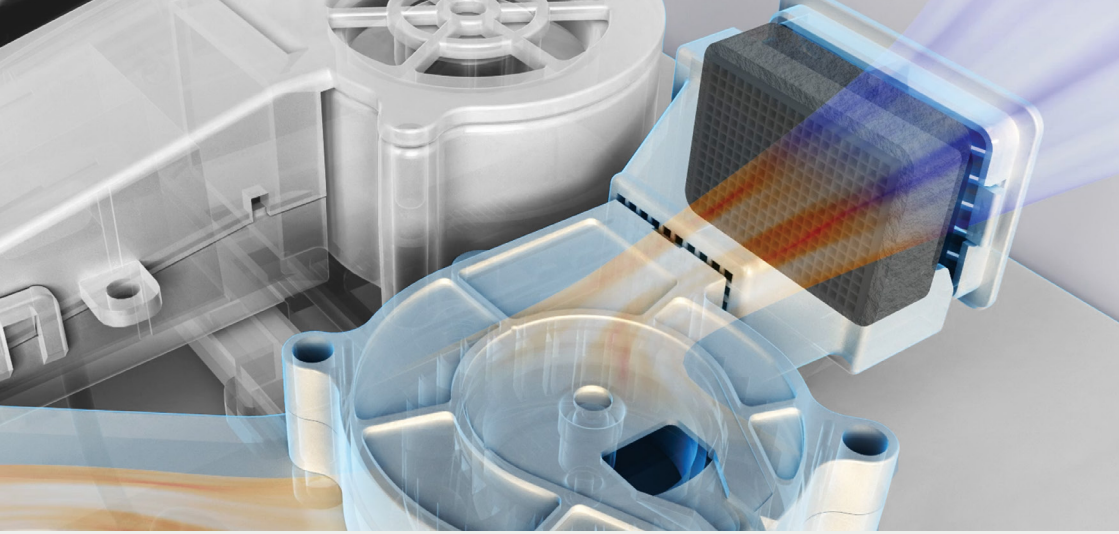

Stainless steel nozzles are washed before and after every use.

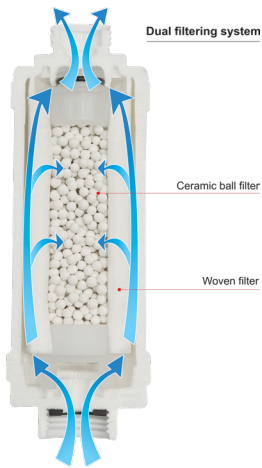

Air Dryer - Air dryers on bidets work by using a gentle stream of warm air to dry the area.

Heated Seat - The heated seat can be helpful for individuals with certain medical conditions that may make it uncomfortable to sit on a cold surface.

Deodoriser - the deodorising filter removes foul odour from the bowl during use

Filter System

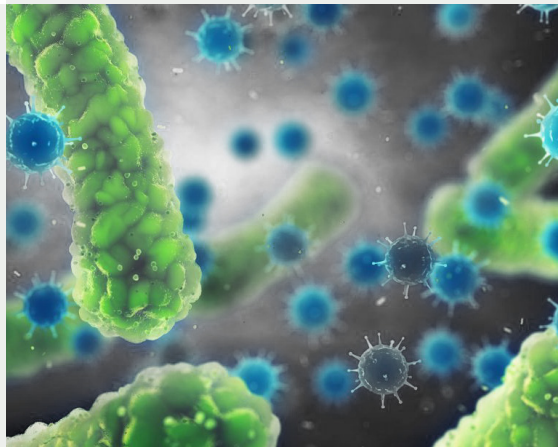

As the water travels through the filter on its way to wash and clean you, it passes first through the sediment filter.

This removes any suspended particles that may build up inside the Bidet water galleries.

Germ Protection

The sediment filter removes particles from the water before entering the bidet. Protecting your internal heating systems.

Water then passes through the ceramic balls, containing silver ions that attack bacteria, germs and virus.

Interchangeable Colour Night Light - A built-in light that can be helpful for use during night time trips to the bathroom.

Energy Saving Function

With consistent use, the bidet figures out the time frame when used often to optimise energy savings.

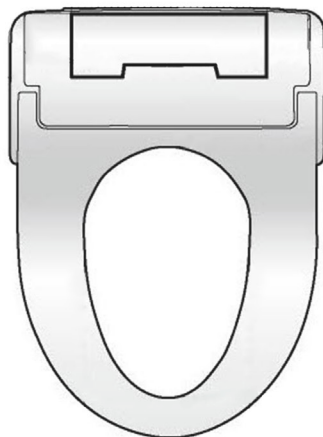

Three sizes available to suit 99% of toilets

Round

'U' Shaped

Elongated

Australia's own brand

Designed for Australia, National is the fastest selling bidet in the country.

All the features of more expensive bidets at a budget cost.
